Rain or shine... if you love being outdoors and have an aptitude for math and technology, consider a career as a natural resources technician.

Using the latest technologies and techniques, students in FVCC's Natural Resources Conservation & Management program gain extensive hands-on experience collecting data in the field, analyzing it in the lab and communicating results in various formats.

Opportunities

- Employment opportunities exist within federal, state and county governmental agencies, as well as private consulting firms.
- Graduates of this program are prepared to pursue bachelor's degrees in forestry, range, water, wildlife and recreation management.
- The mean annual wage for a forest and conservation technician working in the state of Montana is \$38,630, according to the U.S. Bureau of Labor Statistics.

Attributes of Successful Natural Resources Technicians

- Aptitude for math and technology
- Analytical thinker and detail-oriented
- Enjoy working outdoors regardless of weather conditions
- Affinity for the outdoors and nature
- Good communication skills
