

## A Message From the President – August 2021

The CDC recently recommended that fully vaccinated people (as well as unvaccinated individuals) wear masks indoors in places with high Covid transmission rates. Unfortunately, Flathead County is an area with an extremely high Covid transmission rate.

Based on these new CDC recommendations, at this time we are strongly encouraging everyone to wear a mask when inside college buildings and in close proximity to other individuals.

We will continue to assess the situation on a daily basis. We also strongly encourage everyone who is eligible to get vaccinated. The current research indicates that breakthrough cases of infection in those who have been vaccinated is 1%. **In partnership with Logan Health, FVCC will be hosting an on-campus vaccine clinic on September 1.**
