

Electrical Technology Licensure Disclosure

Upon completion of the [Associate of Applied Science in Electrical Technology](#) or [Certificate of Applied Science in Electrical Technology](#), graduates will be eligible for advanced placement into a registered apprentice position in Montana. The AAS in Electrical Technology and CAS in Electrical Technology are recognized by the Montana Department of Labor as an apprentice compliant program of study. All provisions apply only to Montana registered apprentices and registered Montana sponsors. Based on successful completion of the two-year electrical technology program, a maximum of 3,000 OJT hours may be approved by the Registration Agency Program, provided the sponsor elects to grant the 3,000 OJT credit hours or a portion thereof to the apprentice based on demonstration of skills. If the one-year electrical technology program has been completed, the number of OJT credit hours is 1,500. For apprenticeship information, contact the Montana Department of Labor Apprentice Training Board at (406)444-3556.

This disclosure indicates, as of May 18, 2022, the states that FVCC has determined through a reasonable, good faith effort that the electrical technology program meets or does not meet the educational requirements for licensure or certification, or for which states FVCC has yet to make a determination.

If you are planning to pursue professional licensure or certification in a state other than Montana, we recommend that you contact the appropriate licensing board in that state to seek information and guidance regarding licensure or certification requirements before beginning an academic program.
